Index to Volume 75 (1978)

Articles are listed by title, author and subject matter, all together in alphabetical order. Each listing concludes with date of issue, number of issue and page number. For example, "J/J 78 (4); 36" means June/July 1978, No.4, page 36.

A

Absorption Equipment for Solar Air Conditioning, by Lynn A. Stump. J/J 78 (4); 36
AEE Plant Energy Conservation Council, by John Fowler. O/N 78 (6); 3
Air conditioning, automatic control D/J 78 (1); 37
Air conditioning, energy conservation in department stores F/M 78 (2); 13
Air conditioning, office buildings, solar film for D/J 78 (1); 47
Air conditioning, solar absorption equipment J/J 78 (4); 36
Air conditioning, variable air volume system design J/J 78 (4); 30
Air-conditioning System Relies on Waterwheel to Make it Cost-effective A/M 78 (3); 39
Air conditioning systems, reverse cycle A/S 78 (5); 21
Air conditioning timer D/J 78 (1); 36
Air supply & exhaust systems D/J 78 (1); 17
Answer House Story 1978 Update, by Ray D. Bauerband, Sr. A/S 78 (5); 29
Application of Aerial Infrared Thermography to the Measurement of Building Heat Loss, by Richard J. Goldstein. A/M 78 (3); 24
Application of Solar Collectors to Residential Systems, by James Norman. J/J 78 (4); 10
Association of Energy Engineers D/J 78 (1); 1
Automatic control of rooftop air conditioning D/J 78 (1); 37

B

Balk, Daniel, *Using the Computer in Elevator Maintenance.* F/M 78 (2); 51
Battles, Donald, *Cogeneration — Is it Technically and Economically Feasible?* A/M 78 (3); 15
Bauerband, Ray D., *Answer House Story 1978 Update.* A/S 78 (5); 29
Boiler feedwater preheating D/J 78 (1); 51
Boilers, in total energy system for shopping center O/N 78 (6); 22
Boilers, low-pressure steam, heat recovery from flue gases D/J 78 (1); 49
Building "Facelift" Cuts Heating Bills 60%. A/S 78 (5); 15
Building renovation, new window-walls in A/S 78 (5); 15
Burch, Dougias M. and Tamami Kusada, *An Infrared Technique for Estimating Building Heat Loss.* A/M 78 (3); 23

C

Camera, infrared, for building heat loss estimation A/M 78 (3); 23
Chi, Joseph and George Kelly, *A Method for Estimating the Seasonal Performance of Residential Gas and Oil-Fired Heating Systems.* A/M 78 (3); 31
Clothing, a warmth index for A/M 78 (3); 34
Cogeneration, shopping center O/N 78 (6); 22
Cogeneration — Is it Technically and Economically Feasible? by Donald Battles. A/M 78 (3); 15
Combustion air preheating D/J 78 (1); 52
Compressed air generation D/J 78 (1); 17
Compressor motor failures D/J 78 (1); 10
Computers, in elevator maintenance F/M 78 (2); 51
Computerized control of door heaters D/J 78 (1); 31
Computerized control of lights D/J 78 (1); 31
Constance, John D., *PE Exam Q's and A's.* D/J 78 (1); 59
Control, central, & monitoring systems D/J 78 (1); 17

D

Department store, energy conservation F/M 78 (2); 13
Diesel engines, in total energy systems O/N 78 (6); 23
Door heaters, computerized control D/J 78 (1); 31

E

Economic feasibility, of cogeneration A/M 78 (3); 19
Economics, of reverse cycle, closed loop air conditioning systems A/S 78 (5); 22
Economics, of wood fuel A/S 78 (5); 19
Electric billing, analysis A/M 78 (3); 8
Electrical power demand monitoring and control system D/J 78 (1); 30
Electricity, consumption in residences A/S 78 (5); 42
Electricity, generated in cogeneration plant A/M 78 (3); 15
Elevator maintenance, use of computers F/M 78 (2); 51
Energy, wood as a source of A/S 78 (5); 17
  economic analysis for O/N 78 (6); 9
  in department stores F/M 78 (2); 13
  industrial, at General Motors D/J 78 (1); 17
  natural lighting O/N 78 (6); 35
  trash burning for O/N 78 (6); 14
  in the electric utility industry O/N 78 (6); 7
  with new window-wall A/S 78 (5); 15
Energy consumption, industrial O/N 78 (6); 3
Energy Engineering (journal), introduction to first issue F/M 78 (2); 2
Energy management, in department stores F/M 78 (2); 13
Equivalent heat source temperature (EHST) in solar AC design J/J 78 (4); 42
Evacuated tube collector A/S 78 (5); 48

F

Fan shutdown, heating and ventilation system D/J 78 (1); 35
Farber, Erich A., *Quo Vadis, Solar Energy?* J/J 78 (4); 5
Feasibility of an Energy Index for Office Buildings, by Lawrence G. Spielvogel, Joseph Orlando, and Philip Hayes. A/M 78 (26); 26
Federated Department Stores' Energy Conservation Handbook. F/M 78 (2); 13
Feedwater preheating D/J 78 (1); 51
Flue gas heat recovery, from low pressure steam boilers D/J 78 (1); 49
Food services, energy conservation A/M 78 (3); 3
Food services, energy conservation in department stores F/M 78 (2); 13
Fowler, John M., *AEE Plant Energy Conservation Council.* O/N 78 (6); 3
Freeze-up protection, residential solar heating systems J/J 78 (4); 13
Fresh water production with solar energy J/J 78 (4); 8

G

Gas fuel billing, analysis A/M 78 (3); 10
Gasification of wood A/S 78 (5); 19
General Motors: Industrial Energy Conservation D/J 78 (1); 17
Glass, as glazing for solar systems J/J 78 (4); 7
Goldstein, Richard J. *Application of Aerial Infrared Thermography to the Measurement of Building Heat Loss.* A/M 78 (3); 24
Goodman, Paul, *Home Office Deduction — Where it Stands.* J/J 78 (4); 52

H

Hallanger, Erling, *Progress and the Actual Results in Energy Management Systems.* J/J 78 (4); 18
Heat exchangers, flue gas to water D/J 78 (1); 50
Heat loss, building, infrared camera for estimation A/M 78 (3); 23
Heat pipe D/J 78 (1); 28
Heat pumps, closed loop systems A/S 78 (5); 21
Heat reclaimed from ceiling area by powered roof exhauster D/J 78 (1); 39
Heat recovery, from air compressor cooling water D/J 78 (1); 28
Heat Recovery from Low-Pressure Steam Boiler Flue Gases, by Herbert Kunstadt. D/J 78 (1); 49
Heat storage, in reverse cycle air conditioning systems A/S 78 (5); 26
Heat transfer, solar, synthetic fluid D/J 78 (1); 13
Heaters, computerized control D/J 78 (1); 31
Heating, domestic hot water, from flue gases D/J 78 (1); 49
Heating, energy conservation in department stores F/M 78 (2); 18
  make-up air from flue gas D/J 78 (1); 27
  make-up water from condensate D/J 78 (1); 27
  residential, gas and oil-fired systems, estimating seasonal performance A/M 78 (3); 31
  residential, with solar energy J/J 78 (4); 10
  solar, residential A/S 78 (5); 29

Heating, energy cons. in dept. stores (cont'd)
solar, space and domestic hot water J/J 78 (4); 7
solar, swimming pools J/J 78 (4); 7
buildings from process heat D/J 78 (1); 29
Highrise Hotel's Waterwheel Saves Energy. A/M 78 (3); 38
Hillner, William G., *Specification of Solar Collectors.* A/S 78 (5); 46
Home Office Deduction — Where it Stands, by Paul Goodman. J/J 78 (4); 52
Hot water, domestic D/J 78 (1); 13
How Feasible is Cogeneration? A/M 78 (3); 15

I

If only someone who really understood the equipment had come sooner! by Dexter Myers. A/S 78 (5) ; 59
Improved controls D/J 78 (1); 19
Industrial energy conservation O/N 78 (6); 3
at General Motors D/J 78 (1); 17
trash burning for O/N 78 (6); 14
Industrial plants, energy management systems J/J 78 (4); 18
An Infrared Technique for Estimating Building Heat Loss, by Douglas M. Burch and Tamami Kusada. A/M 78 (3); 23
Investment analysis, residential solar systems J/J 78 (4); 17

K

Krachman, Howard E. and Gerald R. Seeman, *Lighting Levels and Energy Saving Techniques.* O/N 78 (6); 29
Kunstadt, Herbert, *Heat Recovery from Low-Pressure Steam Boiler Flue Gases.* D/J 78 (1); 49
Total Energy Plant for Kings Plaza. O/N 78 (6); 22

L

Langbein, Charles E., *Variable Air Volume System* J/J 78 (4); 30
Large Solar Domestic Hot Water Heating System Employs New Synthetic Heat Transfer Fluid D/S 78 (1); 13
Lighting, energy conservation in department stores F/M 78 (2); 13
natural, optics for O/N 78 (6); 35
control, computerized D/J 78 (1); 31
Lighting Levels and Energy Saving Techniques, by Howard E. Krachman and Gerald R. Seeman. O/N 78 (6); 29

M

Marriott's Energy Manual. A/M 78 (3); 3
Mazzeo, Dan, *Wood as an Energy Source.* A/S 78 (5); 17
Measurement, temperature and moisture in experimental houses A/S 78 (5); 35
Megohmmeter Provides Early Warning Of Compressor Motor Failures D/J 78 (1); 10
Meter readings, in energy conservation A/M 78 (3); 6
Method for Estimating the Seasonal Performance of Residential Gas and Oil-fired Heating Systems, by Joseph Chi and George Kelly. A/M 78 (3); 31
Motor failures D/J 78 (1); 10
Multifamily housing, elevator maintenance F/M 78 (2); 51
heat recovery in D/J 78 (1); 49
solar energy for D/J 78 (1); 13
Myers, Dexter E., *If only someone who really understood the equipment had come sooner!* A/S 78 (5); 59

N

Norman, James, *Application of Solar Collectors to Residential Systems.* J/J 78 (4); 10

O

Office buildings, air conditioning, use of water turbine A/M 78 (3); 39
design of variable air volume systems for, J/J 78 (4); 30
energy index, feasibility of A/M 78 (3); 26
use of drapes to cut insolation F/M 78 (2); 34
Optics for Natural Light, Langley Research Center. O/N 78 (6); 35
Oxygen analyzers D/J 78 (1); 32

P

Phantom tube, in lighting conservation O/N 78 (6); 29
Piping, for residential solar systems J/J 78 (4); 14
Plant Burns Trash to Save Energy O/N 78 (6); 14
Plastic glazing, for solar systems J/J 78 (4); 7

Power plants, for cogeneration A/M 78 (3); 15
Preheating, boiler feedwater D/J 78 (1); 51
combustion air D/J 78 (1); 52
Proceedings of the 27th Annual Air Conditioning Conference at the University of Florida. Part 1 J/J 78 (4); 3
Process change or elimination in industrial energy conservation D/J 78 (1); 17
Product specification changes in industrial energy conservation D/J 78 (1); 17
Professional development in energy engineering D/J 78 (1); 1
Professional Development: Keogh vs. IRA. Still Confused? F/M 78 (2); 45
Progress and the Actual Results in Energy Management Systems, by Erling C. Hallanger. J/J 78 (4); 18
Prototype Solar-Powered Office Building in Operation at Walt Disney World, Florida. F/M 78 (2); 42
Psychrometrics, of VAV systems J/J 78 (4); 34

Q

Questions and Answers for the PE exams D/J 78 (1); 59
Quo Vadis, Solar Energy? by Erich Farber. J/J 78 (4); 5

R

Reduce steam pressure to save energy D/J 78 (1); 33
Reflective film, to cut insolation F/M 78 (2); 34
Relative humidity, in residences A/S 78 (5); 41
Renaissance Center, air conditioning system A/M 78 (3); 39
Residences, moisture in A/S 78 (5); 41
Residential heating, solar A/S 78 (5); 29
Reverse Cycle Air Conditioning Systems, by S. W. Trelease. A/S 78 (5); 21
Rooftop air conditioning, automatic control D/J 78 (1); 37

S

Shopping centers, total energy system for O/N 78 (6); 22
Snyder, William T., *The Influence of Energy Cost Escalation on Payback Analysis of Energy Cost Savings Opportunities.* O/N 78 (6); 9
Solar, as a heat source in reverse-cycle AC systems A/S 78 (5); 27
residential systems A/S 78 (5); 29
synthetic heat transfer fluid D/J 78 (1); 13
air conditioning and refrigeration J/J 78 (4); 8
collectors, in residential heating J/J 78 (4); 10
collectors, specification of A/S 78 (5); 46
film, for office buildings D/J 78 (1); 47
water and space heating J/J 78 (4); 7
Specification of Solar Collectors, by William G. Hillner. A/S 78 (5); 46
Spielvogel, Lawrence G., Joseph Orlando, and Philip Hayes, *Feasibility of an Energy Index for Office Buildings.* A/M 78 (3); 26
State Energy Audit Impact 78 Workshop. F/M 78 (2); 8
Steam generation D/J 78 (1); 17
Steam pressure and energy conservation D/J 78 (1) 33
Storage, solar, in residential heating systems J/J 78 (4); 13
solar energy J/J 78 (4); 44
Stump, Lynn A., *Absorption Equipment for Solar Air Conditioning.* J/J 78 (4); 36
Swimming pools, heating, solar J/J 78 (4); 7

T

Timer, air conditioning unit D/J 78 (1); 36
Torridoor Standard Heating System, (reprint from Jan. 1909). O/N 78 (6); 49
Total Energy Plant for Kings Plaza, by Herbert Kunstadt. O/N 78 (6); 22
Trelease, S. W., *Reverse Cycle Air Conditioning Systems.* 78 (5); 21
Turbine, water, in office building chilled water system A/M 78 (3); 39

UVW

Using the Computer in Elevator Maintenance, by Daniel Balk. F/M 78 (2); 51
Variable Air Volume Design, by Charles E. Langbein, Jr. J/J 78 (4); 30
Warehousing, energy conservation in department stores F/M 78 (2); 13
Warmth Index Will Inform Consumer About Insulating Value of Clothing. A/M 78 (3); 34
Waste heat recovery to preheat make-up air D/J 78 (1); 28
Waste oil as a heat source D/J 78 (1); 32
Wood as an Energy Source, by Dan Mazzeo. A/S 78 (5); 17
